Plot Comments: All varieties were double inoculated. They also received 8 gal/acre of 10-34-0 and 5 gal/acre of 15-0-0-20 in a 2x2 band at planting. We used 5B040 as an agronomic test this year. One strip we shut off the 2x2 band so it received no 15-0-0-20 and no 10-34-0. The other strip we kept the 2x2 band on as well as side dressed 25 gal of 28% when we sidedressed our corn.

Gross \$ / acre are calculated at \$8 / Bu. and wet yields were adjusted to 13% moisture
